

ARMY FACILITIES COMPONENTS SYSTEM

REDi WEB PORTAL FACT SHEET

The Army Facilities Components System (AFCS) Web Portal is in transition. By spring of 2015, the web portal will become the new Knowledge Management System (KMS), which is a fundamental part of the changes that are occurring to AFCS as the Joint Construction Management System (JCMS) emerges.

The current AFCS web portal (<https://redi.usace.army.mil/sites/afcs/default.aspx>) is located on the United States Army Corps of Engineers (USACE) Reachback Engineer Data Integration (REDi) Site; the official website of the USACE Reachback Operations Center (UROC). The UROC is an extremely powerful and versatile tool for the deployed military engineer. It offers Common Access Card (CAC)-authenticated users 24/7 access to online resources for equipment support, online training, and engineer publications. It also hosts an interactive request-for-information (RFI) service that connects military engineers to experienced engineers, IT professionals, and equipment technicians who provide exceptional customer service support tailored to the deployed Soldier's needs.

Although the changes that are coming for the KMS version of the web portal are incremental in nature, the current AFCS REDi page offers a variety of features to the AFCS and Theatre Construction Management System (TCMS) software user community:

AFCS Information

Find the latest information on the transition from TCMS v3.2 to JCMS v1.0, a calendar of upcoming events, and a brief overview of all AFCS has to offer.

Helpdesk

Call the AFCS/UROC team Toll-Free at **1-877-ARMY-ENG** or email UROC@usace.army.mil.

TCMS Software Support

Request software, submit an RFI for IT support, or download the latest user manuals.

Project Folders

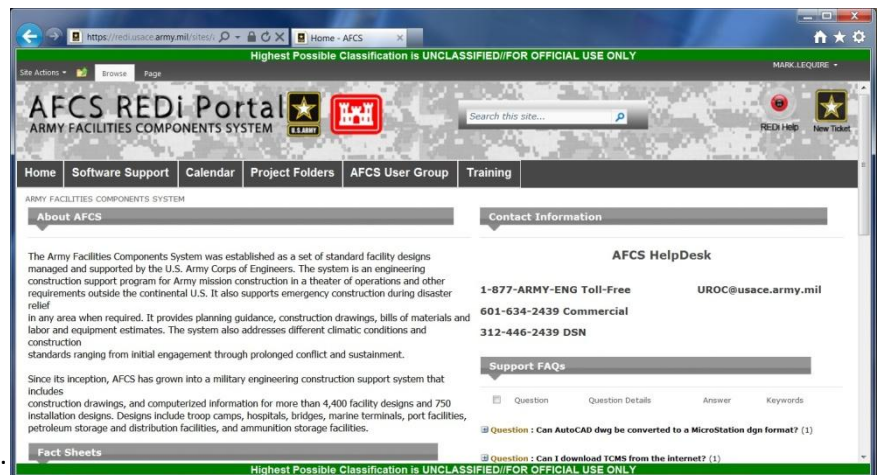

Before the release of JCMS v1.0, view or download a selection of UFC compliant project folders from the AFCS repository.

User Group

Join the User Group to receive the current progress on, and an opportunity to provide input into the development and refinement of JCMS. Experienced users may even be selected to test the latest software.

TCMS Training

Access the latest AFCS training courses. Units can also request onsite training for their organization from experienced AFCS instructors.

JANUARY 2014

The proponent for Army Facilities Components System (AFCS), AR 415-16, is Headquarters Department of the Army, Office of the Chief of Engineers. For additional information, please visit the AFCS REDi web portal at <https://redi.usace.army.mil/sites/afcs/default.aspx> or call toll free 1-877-ARMY-ENG (1-877-277-9364), commercial 601-634-2439, or DSN 312-446-2439.
